Tables are supported by the `xtables` environment.

A	B
1	2
3	4

Table 1 Default Layout Table

Tables support the `:option` keyword in `#+ATTR_CONTEXT`. This keyword is passed to the `option` parameter of the `\startxtable` command. Here's the same table with `:option stretch`:

A	B
1	2
3	4

Table 2 Stretch Layout Table

Tables without headers have a top and bottom line by default.

Cell A	1	2
Cell B	2	3

Table 3 Simple Table

Here's a very long table. We can split it by setting `:split t` and `:header repeat` in `#+ATTR_CONTEXT`.
